

ONUR KENİ

FRONTEND DEVELOPER

+90 555 073 10 16 | onurkeni@outlook.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Frontend Developer with 4+ years of industry experience, having worked on modern web applications across three different companies. Specialized in Vue.js and Nuxt.js, with hands-on experience in Angular and React-based projects. Skilled in building scalable, performance-driven, and user-centric interfaces using Tailwind CSS, Bootstrap, SCSS, Material UI, and shadcn/ui.

Experienced in monorepo architectures utilizing Nx and Turborepo, with solid knowledge of build and automation tools such as Webpack, Gulp, and Grunt. Worked extensively with REST APIs and GraphQL, supported backend workflows using Strapi, and possess foundational experience with Node.js.

Proficient in API testing and documentation using Postman and Swagger, and highly experienced in collaborating with design teams through Figma, Adobe XD, Zeplin, and Storybook to ensure smooth design-to-development handoffs. Contributed effectively within Agile and Scrum teams, focusing on clean code practices, performance optimization, and maintainable frontend architectures, while actively supporting the growth of guild structures and technical standards within the organization.

WORK EXPERIENCE

Roof Stacks

Frontend Developer

Dec/2021 – Jan/2026

- Developed a modular, scalable, and SEO-friendly frontend architecture for B2C products using Nuxt.js and TypeScript, integrating REST APIs and optimizing performance for high-traffic, customer-facing applications.
- Built enterprise-focused B2B interfaces using Angular and TypeScript, creating reusable components and scalable application structures to support internal and partner-facing workflows.
- Implemented marketing-focused landing pages with Next.js, contributing to improved SEO performance and page load optimization.
- Played an active role in integrating multiple travel services, including flight tickets, hotels, car rentals, bus tickets, and VIP transfer modules, supporting the platform's multi-service product architecture.
- Contributed to the CRP module serving 4,000+ agencies across 16 countries, while collaborating closely with design teams to help establish a reusable, enterprise-scale design system.

ULogi

Jr. Frontend Developer

May/2021 – Dec/2021

- Contributed to the frontend development of B2B and B2C dashboards for ULogi, a logistics platform providing solutions for both individual and corporate users.
- Supported the digital transformation of logistics operations for Uçak Kardeşler in Turkey by translating operational workflows into user-friendly web interfaces.
- Collaborated closely with embedded systems and backend teams to ensure smooth data flow and seamless system integrations on the frontend.
- Built responsive and maintainable interfaces using HTML5, CSS3, SCSS, Bootstrap, and Material Design.
- Gained hands-on experience with JavaScript, jQuery, Angular, and Gulp.js, contributing to component-based development and frontend build processes.

Dijital Sahne

Intern Frontend Developer

Mar/2021 – May/2021

- Contributed to the frontend development of multiple projects, including the Mann+Hummel B2B Dashboard (actively used across 16 countries in the EMEA region), OMV Gas B2B Dashboard, Istanbul Finance Center landing page, and Molfix and Gleen landing pages under Hayat Holding.
- Supported the development of interfaces for corporate and multinational projects, focusing on delivering consistent and user-friendly frontend implementations.
- Built responsive and cross-browser compatible user interfaces using HTML5, CSS3, SCSS, and Bootstrap.
- Developed interactive UI components with jQuery to enhance user experience.
- Assisted in frontend build and automation processes using Gulp.js, contributing to more efficient development workflows.

SKILL

Frontend Technologies:

HTML5, CSS3, Sass/SCSS, JavaScript (ES6+), TypeScript, Vue.js, Nuxt.js, React.js, Next.js, Angular, jQuery

UI & Styling:

Tailwind CSS, Bootstrap, Material UI, Radix UI, shadcn/ui, Vuetify, PrimeNG

Backend & APIs:

Node.js (Basic), REST APIs, GraphQL, Strapi

Build, Tooling & Testing:

Webpack, Gulp, Grunt, Postman, Swagger

Design Collaboration & Systems:

Figma, Adobe XD, Zeplin, Storybook

Version Control:

Git

EDUCATION

Trakya University, International Relations and Affairs – Bachelor's degree (2017–2021)
